

BriefCam – The Video Synopsis Company

- Get better evidence, faster
- Reduce time and cost of manpower
- Utilizes user's experience, intelligence, intuition
- Easy to install. Easy to use
- Replaces current "fast forward" review method
- All events played in real-time speed
- Makes total video review part of the daily routine
- Seamless integration with existing solutions
- Summary-on-demand, with no extra processing
- Online event management
- Rapid industry acceptance

BriefCam VS Online

Video Synopsis for on-site, online security

BriefCam meets the unmet global need to review video, identify and investigate incidents quickly, and take action. BriefCam's Video Synopsis technology lets users browse hours in minutes, compacting daily and weekly events into a "brief" for rapid review.

Video Synopsis will, for the first time, make reviewing all video feed possible and convenient, and turn Total Video Review into part of the daily security routine.

BriefCam VS Online receives online feed from the DVR/NVR and processes data to produce a database that can be called on to create a video summary presentation, on demand.

VS Online imports and processes video from the systems commonly used by law enforcement, government agencies, educational facilities, municipalities and loss prevention organizations.

BriefCam VS Online is compatible with all leading DVR/NVR brands and is an easy-to-install third-party software that does not change existing ecosystems.

Key Features

- Index and view original event video as recorded
- 1 BriefCam server supports up to 16 cameras
- Summarizes hours of events up to present time
- Easy to use, intuitive Graphic User Interface
- Set summary speed and event density
- Isolate and scroll individual events
- Select and time-stamp events
- Area of Interest marks off section for synopsis
- Client support for unlimited number of channels
- Support for all leading NVR brands
- Export synopsis as AVI file

System Requirements

BriefCam Server PC Minimum Requirements:

- CPU: Quad core, e.g., Intel Q9400 ,Q9450, Q9550 or stronger; AMD 9600 or stronger.
- Memory: At least 2G RAM
- Available disk space: 1 terabyte (TB)
- Operating System: English Windows XP-Pro w/.NET2.0
- Requires software license activation

BriefCam Client PC Minimum Requirements:

- Memory: 2G RAM
- Display: XGA (1024x768)
- Operating System: English Windows XP-Pro 32bit .NET2.0

Video Synopsis Technology in Brief:

BriefCam's Video Synopsis (VS) technology

Provides a very short video representation of a long time period, while preserving all essential activities of the original video. The synopsis serves as an index into the full video, and is performed in three stages.

1. Ingest: Original video from the DVR/NVR is fed into the BriefCam server, analyzed and separated into background (all static, non-moving objects) and foreground (moving objects). Moving objects are extracted and descriptions inserted into a database.

2. Synopsis: Users specify a time period of interest (e.g. last 24 hours), and all relevant objects and backgrounds for the specified period are extracted from database. A very short synopsis is generated from these objects and backgrounds.

3. Indexing: Users select an object of interest that points to the original video, showing it as recorded.

The result: With BriefCam Video Synopsis, hours of footage can be processed and reviewed in full in minutes. Events and evidence that previously would not have been exposed can now be uncovered.
